

MOHAMMAD BAKHSHI

Mohammadbakhshi1979@gmail.com | +98 939 544 8047 | Tehran, Iran | [LinkedIn](#)

- **Senior Backend Engineer**, with 5+ years of experience building **API and microservices** with **NestJS and Express**, and working with **SQL and NoSQL databases** across **IoT, financial services, and technology projects**.
- Built scalable **Node.js** backend systems for **IoT and digital products**, delivering **1,000+** REST APIs with **NestJS, Express.js, and TypeScript** for **20M+** daily requests and **10,000** connected devices. Improved response times by up to 60%, cut database load by up to **80%**, and reduced regressions by **50%** through database tuning, Redis caching, and **100+** tests.

PROFESSIONAL EXPERIENCE

Node.js Backend Developer
BehTech | Tehran

Dec 2025- Present

- Developed and maintained 5 **scalable backend services** using **Node.js, TypeScript, and Express.js**, supporting 3K+ **users/clients** and processing 100K+ **requests per day**; applied modular architecture and clean coding practices to reduce feature delivery time by **50%** and improve service uptime to **60%**.
- Designed and implemented **100+ secure, well-documented RESTful APIs** for 4 **core business workflows**, supporting 4 **frontend and third-party integrations**; introduced validation, authentication, standardized error handling, and reusable service layers, improving API success rates by 60% and reducing integration time by **50%**

Node.js Backend Developer
Linkap | Tehran

Dec 2023 - Jul 2026

- Developed REST APIs for an IoT mobile application supporting smart-home device control, status monitoring, and automation workflows across **100 device types** and **10000 connected devices**
- Built and maintained **Node.js/NestJS** backend services. Contributed to backend improvements focused on performance, maintainability, and delivery quality
- Optimized 4 backend services, 50 endpoints and 8 database queries, reducing average response time by 60% and improving code quality through modular NestJS architecture and automated testing
- Defined API contracts and delivered 50 endpoints with frontend developers, resolving 10 integration issues and reducing frontend-backend rework or release delays by 50%

Node.js Backend Developer
ChartBox | Tehran

Dec 2022 - Nov 2023

- Developed **100+ RESTful API endpoints and CRUD operations** with JavaScript, Node.js, Express.js, and NestJS, supporting **4 core application workflows** and handling **10000+ daily requests**
- Built **4 TypeScript backend services** using modular architecture, validation, and structured error handling, reducing production defects by **60%** and improving feature delivery time by **50%**
- Implemented Redis caching and temporary data management for **5 high-traffic resources**, reducing database load by **80%** and improving response times by **70%**
- Created **4 API specifications, technical documents, and development reports**, reducing integration questions and handoff time by **80%** across **3 team members**

Node.js Backend Developer

May 2022 - Nov 2022

- Optimized MongoDB schemas and queries for **2 high-traffic workflows**, reducing API response times by **40%** and database load by **60%**
- Implemented Passport.js authentication and authorization across **3 services**, reducing unauthorized-access risks and achieving **95% successful authentication reliability**
- Built **100+ unit, integration, and end-to-end tests** with Jest using TDD and BDD practices, increasing test coverage from **30% to 70%** and reducing regressions by **50%**

EDUCATION

- **Computer Engineering** | Shahed University (2019 - 2023)

TECHNICAL SKILLS

Backend Frameworks & Runtimes: Node.js, Express.js, NestJS

Programming Languages: JavaScript, TypeScript

Database Systems: PostgreSQL, MongoDB (NoSQL), Database Schema Design, Database Optimization

Testing & Quality Assurance: Jest, Cypress, Unit Testing, Integration Testing, Automation Testing

API Design & Documentation: RESTful API Design, GraphQL, Swagger, OpenAPI Specification, Postman

Development Tools & CI/CD: Git, Docker, CI/CD Pipelines

Architecture & Methodologies: Microservices Architecture, OOP, SOLID Principles
